

# C 10:8X

- ► Eight channels in 2U Extremely high channel density reduces space requirements and installation time
- High continuous output power of 125 W per channel at 70 V, 4 ohms, 8 ohms, and 16 ohms\*
- All channels individually selectable for Io-Z or hi-Z
   Loudspeakers (2 ohm 16 ohm) and distributed systems can be connected to the same unit
- Bridged operation Channel pairs bridgeable for increased output or for driving 100 V systems
- Patented output stage based on Class D topology
- High efficiency for lower thermal stress

- General Purpose Input/Output (GPIO) Compatible with third-party control systems
- ► NomadLink® network ready
- Universal Power Factor Corrected PSU with IEC inlet
- ► Efficient cooling Dual variable speed fans and parallel airflow over output devices provide uniform cooling
- Comprehensive circuit protection and fault indication
- Phoenix-style input connectors and barrier strip output connectors

## An Installation Amplifier without Compromise

Lab.gruppen amplifiers have earned an enviable worldwide reputation for sonic excellence and rock-solid durability in touring sound applications. These same qualities are now available for a broad range of installed sound applications in the C 10:8X amplifier. By offering an unmatched combination of channel density, operating efficiency and configuration flexibility, the C 10:8X presents convincing performance and cost-saving advantages. Applications include primary systems for theme parks, shopping malls, airports, hotels and restaurants as well as auxiliary systems for performance venues, houses of worship and numerous other installed sound applications.

To achieve higher channel density without compromising performance, Lab.gruppen engineers developed a new output stage design. Based on a patented Class D circuit topology, these output stages produce sustained high power levels with very low distortion while maintaining efficiency levels of near 90%. A new universal switching power supply employs Power Factor Correction (PFC) to stabilize current draw, and it accepts any mains voltage from 100 – 240 V (+/- 10%) @ 50 Hz or 60 Hz through the appropriate IEC cord.

The C 10:8X includes include unique features which enable each unit – or even each channel – to be configured for a specific application or load condition. Input gain is selectable in four-channel groups, and a 35 Hz high pass filter may be inserted. All channels are bridgeable in pairs, and Lab.gruppen's exclusive Voltage Peak Limiter (VPL) feature allows each channel to be individually optimized for the reactive characteristics of the connected load.

For comprehensive remote monitoring and control, the C 10:8X includes NomadLink® network ports for connecting to an optional NLB 60E NomadLink® Bridge & Controller Network and an Ethernet-linked PC. With NomadLink®, key amplifier parameters are displayed via DeviceControl software, and remote control of channel mute and power on/off is under network control. Alternatively, the GPIO facilities allow access to key amplifier functions via third-party remote control systems.

To ensure a long and trouble-free service life, the C 10:8X incorporates extensive features to safeguard internal circuits and connected loads. Protection and warning circuits prevent damage or service interruptions due to excessive current, DC at output, over-temperature, non-musical VHF (very high frequencies), and open load conditions. In addition, soft-start and PSU current limiting protect the mains supply from interruptions due to tripped circuit breakers or blown mains fuses.

## **Applications**

- ► Auditoriums
- Performing Arts Centers
- ► Convention Centers
- Stadiums and Arenas
- ► Theme Parks
- ► Hotels
- ► Houses of Worship
- Restaurants
- ► Clubs
- ► Educational Establishments
- ► Boardrooms
- ► Museums
- Offices
- ► Shopping Malls
- ► Transportation Facilities

# **Specifications C 10:8X**

Number of channels

Peak total output all channels driven	1000 W					
Peak output voltage per channel	100 V / 70 Vrms					
Max. output current per channel	5.6 Arms					
Max. Output Power	16 ohms	8 ohms	4 ohms	2 ohms	Hi-Z	
Per ch. (all ch.'s driven)	125 W	125 W	125 W	60 W	125 W (70 Vrms / 100 V peak)	
Bridged per ch.	250 W	250 W	125 W	n.r.	250 W (140 Vrms / 200 V peak)	
Performance with Gain: 32 dB and VPL: 100 V						
THD 20 Hz - 20 kHz for 1 W	<0.1%					
THD at 1 kHz and 1dB below clipping	<0.05%					
Signal To Noise Ratio	>112 dBA					
Channel separation (Crosstalk) at 1 kHz	>70 dB					
Frequency response (1 W into 8 ohms) +0/-3 dB	2.3 Hz - 56 kHz					
Input impedance	20 kOhm					
Input Common Mode Rejection, CMR	50 dB					
Output impedance @ 100 Hz	48 mOhm					
Voltage Peak Limiter (VPL), max. peak output						
VPL, selectable per ch. 3)	100, 63, 45, 32 V					
VPL, selectable when bridged 3) 1)	200, 126, 90, 64 V					
Voltage Peak Limiter mode (per ch.)	Hard / Soft					
Gain and Level						
Amplifier gain selectable (all channels) 1)  – rear-panel switches	29, 32, 35, 38 dB					
Default gain	32 dB					
Level adjustment (per ch.)	Front-panel potentiometer, 21 position detented from -inf to 0 dB, hidden behind security panel/dust filter grille					
Connectors and switches						

Input connectors (per ch.) 3-pin Phoenix, electronically balanced Barrier strip 2-pole screw terminals Output connectors (per ch.) Output bridge mode A+B, C+D, E+F, G+H, inputs A, C, E, G are signal source High pass filter Fixed at 35 Hz, switchable per channel NomadLink® network On board, 2 x RJ45 connectors, IN and OUT Intelligent fans (on/off) Yes, depending on presence of output signal Power on/off and Remote enable on/off Individual switches on front-panel Cooling Two fans, front-to-rear airflow, temperature controlled speed General Purpose Outputs (GPO) Contact Closure types, 2-pole Phoenix General Purpose Inputs (GPI) Contact Closure types, 2-pole Phoenix

### Front-panel indicators

NomadLink® Network; Power Average Limiter (PAL) 2); Power on Common Signal present / High-impedance; Voltage Peak Limiter (VPL); Current Peak Limiter (CPL); Per channel Very High Frequency (VHF); High temperature; Fault; Mute

#### Power

Operating voltage, 230 V / 115 V nominal 100-240 V 80 V Minimum power-up voltage, 230 V / 115 V Power Average Limiter (PAL) <sup>2</sup> Yes Soft start / Inrush current draw Yes / max. 5 A Mains connector IEC Inlet / NEMA 5-15P

Dimensions (W/H/D) W: 483 mm (19"), H: 88 mm (2 U), D: 343 mm (13.5") Weight Black painted steel chassis with gray painted steel front

Approvals CE, ANSI/UL 60065 (ETL), CSA C22.2 NO. 60065, FCC

Note 1): Automatic -6 dB gain compensation when bridging channels. Ch.'s A+B and/or C+D, E+F, G+H, can be bridged individually.

Note 2): PAL can reduce the maximum output power to keep the power supply operating safely, and/or to prevent excessive current draw tripping the mains breaker. Refer to Operation Manual.

Note 3): For sine waves, peak voltage output values translate to Vrms with the formula V/1.41 = Vrms. E.g. 100 V peak equals app. 70 Vrms. Hence, outputs can be set for high-impedance loads without requiring a transformer.

All specifications are subject to change without notice.
